Gourav Dash

Delhi | gaurav.dash05@gmail.com | 8810228783 | GouravDash.tech | Gourav Dash | GariFFon

Skills

Languages: C/C++, Java, Python, JavaScript, TypeScript
Framework: HTML5, CSS3, React.js, Next.js, Tailwind CSS, Node.js, Express.js, Django, PHP, Firebase Admin, Mongoose
Databases: MongoDB, PostgreSQL
Tools: Git, Linux, Figma, Node-Cron, Nodemailer
Soft Skills: Leadership, Team Management, Problem-solving, Adaptability, Time Management

Experience

Exanor (Cybroxide Technologies) *June 2026 - Aug 2026*
Software Development Engineer Intern (SDE Intern)

- Built a local, zero-cost **GST invoice & bank-statement extraction pipeline** (OCR + deterministic validation), improving **row-level reconciliation from 67% to 96%** on 390+ real transactions, running entirely within an **8GB RAM** constraint with no paid LLM APIs
- Architected a **Role-Based Access Control (RBAC) system** enforcing granular, hierarchy-based permissions across 8+ distinct user roles (Admin, HR Manager, TSF, Sales Partner, Lead Expert, ASF, Sales Head)
- Enforced a two-layer defense combining **JWT-based middleware** route guards with server-side authorization checks, blocking unauthorized access on every sensitive API endpoint
- Developed **REST endpoints** via Next.js API routes, integrating Firebase Admin, Mongoose (MongoDB), JWT authentication, and Node-Cron scheduled jobs
- Automated an **email service** with Nodemailer and Node-Cron, dispatching meeting confirmations and lead-follow-up reminders

Projects

YouTube Comment Analyzer — *React.js, TypeScript, Tailwind CSS, Express.js, YouTube Data API v3* *Nov 2025*

- Developed a full-stack web application that fetches and analyzes YouTube comments with smart categorization into Questions, Jokes, and Discussions
- Implemented advanced Trie data structure for fast prefix-based search with O(m) time complexity
- Designed interactive data visualizations using Recharts with YouTube-themed design and glassmorphism effects
- Integrated YouTube Data API v3 for real-time comment fetching with TanStack Query for state management

Recipe Sharing & Cooking Tips Portal — *MongoDB, Express.js, React.js, Node.js, JWT, OAuth 2.0* *Jan 2025*

- Engineered a full-stack MERN application for sharing recipes and cooking tips with authentication and authorization
- Architected secure user authentication using JWT and Google OAuth 2.0 with Passport.js
- Created RESTful APIs with Express.js for recipe management, user profiles, and password management
- Built responsive frontend with React.js, featuring smooth animations using GSAP and Framer Motion

Training

Algotutor - Competitive Programming — Certificate *July 2025 - Aug 2025*

- Completed an intensive 2-month training program focused on competitive programming and algorithmic problem-solving
- Mastered advanced data structures and optimization techniques including dynamic programming, greedy algorithms, divide-and-conquer strategies, and number theory
- Developed problem-solving approaches including pattern recognition, time-space complexity analysis, edge case handling, debugging skills, and writing clean optimized code under time constraints

Certificates

- The Bits and Bytes of Computer Networking by Google — Certificate Sep '24
- Introduction to Front-End Development by Meta — Certificate Nov '23

Achievements

- ICPC-2025 (Institute Topper)
- LeetCode: Rating 1674, Top 15%, 365 Days Badge, 740 problems solved
- CodeForces: Rating 1010, CodeChef: Rating 1271
- Solved more than 1000 problems across different platforms
- State-level Badminton Player

Education

Lovely Professional University — Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering, **CGPA: 8.02** — Since Aug '23

Lovely Public Senior Secondary School — New Delhi
High School (CBSE), **Percentage: 74.7%** — 2022 - 2023
